

Meeting Minutes – Prepared by William Wadsworth

Date: 3/14/2024

Time: 1:40 PM – 3:00 PM

Location: Cyber Security Lab

Attendees:

- Anthony
- Corey
- Dylan
- Parker
- Will
- Zach

Meeting Contents (4):

1. Decided to have everyone implement the no aggregation (all direct flights) method approach as a baseline together, instead of in groups.
2. Discussed our next selection of modules:
 - a. Route – Zach, Corey
 - i. List of each possible flight to take (includes source/destination airport, aircraft type, distance, demand, estimated time, and fuel requirement).
 - b. Flight – Dylan
 - i. List of every flight taken (includes the flight number, when it was scheduled, aircraft type, route taken, and number of passengers).
 - c. Passenger – Anthony, Parker
 - i. List of every passenger traveling with Comfort Airlines (includes source/destination airport, location of the passenger, list of flights they have taken, and a unique identifier).
 - d. Updating SRS – Will
 - i. Making changes based on checkpoint feedback.
3. Created preliminary outline of the last selection of modules:
 - a. Simulation
 - b. Scheduler
 - c. Ledger
4. The rest of the meeting was spent working on our respective tasks.
